## WORK EXPERIENCE

Datability

Noida

### Software Testing Engineer

Jul 2025 - Present

- Understood project requirements and provided accurate testing estimates.
- Prepared and executed detailed test cases to validate functionality and performance.
- Identified, logged, and tracked defects using the **JIRA** tool.
- Created and executed automated test scripts using **Selenium, Java, JUnit, TestNG, and Jenkins**.
- Improved test execution speed and software quality through automation.
- Designed and implemented efficient **test frameworks** to streamline testing processes.
- Performed **regression, integration, and performance testing** to ensure stability and reliability.
- Collaborated with developers to create effective test strategies and ensure issue resolution.
- Analyzed test results, prepared reports, and contributed to continuous process improvement.

### Associate Software Engineer

Oct 2024 - Jun 2025

- Gained hands-on experience in **both Automation and Manual Testing** across web and Android platforms.
- Designed, developed, and executed automated test scripts using **Selenium, Java, TestNG, JUnit, Cucumber, and Jenkins**.
- Practiced **Agile methodologies** and managed defects effectively using **JIRA**.
- Collaborated with cross-functional teams to ensure product quality and timely delivery.
- Conducted **data analysis, client demos**, and actively participated in **team meetings** to improve testing efficiency.

### Software Testing Engineer Intern

Mar 2024 - Sep 2024

Performed functional, regression, and UI testing for web applications. Collaborated with developers to identify and resolve defects, improving release quality. Contributed to faster deployments and enhanced overall product performance through efficient test case execution and defect reporting.

## PROJECT EXPERIENCE

iZOOTO

Noida

### Software Testing Engineer

Mar 2024 - Present

- Worked on **iZOOTO**, a web push notification platform for delivering targeted and personalized notifications.
- Developed and maintained **automated test scripts** using **Selenium** and **TestNG** to validate core functionalities.
- Designed and implemented **test frameworks** to streamline automation and improve testing efficiency.
- Conducted **regression, integration, and performance testing** to ensure product reliability and stability.
- Collaborated closely with developers and product teams to ensure business requirements were met.
- Analyzed **test results**, identified defects, and documented issues for timely resolution.

## EDUCATION

### Purnea Engineering College

Purnea, Bihar

B.Tech (Electronics and Communication Engineering)

Graduation Date: Date

Higher Secondary Education (State Board)

Graduation Date: Jun 2010

Secondary School Education (Matriculation)

Graduation Date: Jun 2008

## SKILLS & INTERESTS

**Skills:** Software Testing Lifecycle, Automation Testing, Manual Testing, Selenium, JUnit, TestNG, Cucumber, Java, Jenkins, Agile Methodologies, Defect Management (JIRA), Test Case Preparation, Regression Testing, Integration Testing, Performance Testing, Requirement Traceability Matrix, Data Analysis, Client Demos, Project Management
